Integration Design Canvas

InnoPlot Innovation Paradox Thinking Toolkit | v2.3

Think visually. Decide intuitively. Test systematically.

COMPLETED EXAMPLE

A3 LANDSCAPE · DESIGN & TEST

01 INTEGRATION LOGIC | COMBINE BOTH CONVICTIONS

Combine engineering capability with customer
and service insights in existing product projects.

02 DESIGN PRINCIPLES | WHAT MUST GUIDE US?

Joint problem definition; early customer input;
shared project goals; existing governance.

03 KEY INITIATIVES

Run one cross-functional predictive-
maintenance development project.

04 CAPABILITIES & RESOURCES

R&D and AI engineers; service data;
product management; customer access.

05 EXPECTED VALUE

More relevant features; faster feedback;
better customer fit and adoption.

06 RISKS & TRADE-OFFS

Coordination delays; competing priorities.
Mitigate with clear ownership and timeboxes.

07 KEY HYPOTHESIS & FIRST EXPERIMENT

BELIEF Joint customer input improves relevance.
TEST Pilot one development project with
customer validation at two decision points.

08 NEXT STEPS & LEARNING REVIEW

OWNER Product manager + engineering lead
REVIEW After first prototype and customer test
DECIDE Continue, adapt or discontinue.
