Dynamic Alternation Design Canvas

InnoPlot Innovation Paradox Thinking Toolkit | v2.3

Think visually. Decide intuitively. Test systematically.

COMPLETED EXAMPLE

A3 LANDSCAPE | DESIGN & TEST

01 TRIGGERS & CONDITIONS

Major technology breakthrough

Significant change in customer demand

New entrant or regulatory shift

02 ALTERNATION MECHANISM

Portfolio team reviews signals quarterly

MT decides whether primacy should shift

Use explicit thresholds and communicate why

03 KEY INITIATIVES

Define a short list of strategic triggers

Trial one decision review in a programme

Document the reasons for any change

04 CAPABILITIES & RESOURCES

Technology and market intelligence

Portfolio decision rights and clear roles

Rapid communication across functions

05 EXPECTED VALUE

Faster response to genuine change

Better timing of strategic commitments

Reduced lock-in to one innovation logic

06 RISKS & TRADE-OFFS

Risk: frequent switching creates instability

Mitigation: thresholds and review cadence

Risk: ambiguous evidence

Mitigation: triangulate signals

07 KEY HYPOTHESIS & FIRST EXPERIMENT

BELIEF: explicit triggers improve decisions

TEST: simulate or trial one portfolio review

EVIDENCE: clarity, speed and reversals

08 NEXT STEPS & LEARNING REVIEW

STATUS: exploratory only; not prioritised

OWNER: portfolio lead, with MT sponsor

REVIEW: after one or two review cycles
