Dynamic Alternation Design Canvas

InnoPlot Innovation Paradox Thinking Toolkit | v2.3

Think visually. Decide intuitively. Test systematically.

GUIDED CANVAS

A3 LANDSCAPE | DESIGN & TEST

01 TRIGGERS & CONDITIONS

Which changes could justify shifting primacy

between Capability Push and Market Pull?

What evidence would trigger a review?

02 ALTERNATION MECHANISM

Who decides when to shift?

What signals and thresholds will be used?

How will the change be communicated?

03 KEY INITIATIVES

What small actions will help us practise

deliberate shifts in strategic emphasis?

04 CAPABILITIES & RESOURCES

What sensing, decision-making and

coordination capabilities do we need?

05 EXPECTED VALUE

How would timely shifts create value?

What improvement would we expect?

06 RISKS & TRADE-OFFS

Could switching cause confusion or instability?

How can we avoid reacting to weak signals?

07 KEY HYPOTHESIS & FIRST EXPERIMENT

What assumption about shifting will we test?

What small pilot could challenge it?

What evidence would change our view?

08 NEXT STEPS & LEARNING REVIEW

Who owns the pilot and the decision?

When do we review results?

Continue, adapt, defer or discontinue?
